Ms. Baker,

The July 8 letter names you as RSO and sends your experience and training with radioactive materials, which looks fine. We will also be listing you as an authorized user of the licensed material.

It also asks to name Dr. Furlong as an authorized user. Looking back through the license, he has never been named as a user and we have no experience/educational background for him, with respect to working with radioactive materials. We need some documentation that he has training and experience in the use of radioactive materials for the purposes listed on the license. Also, should Dr. Tenney continue to be listed on the license? You can list as many people as authorized users as you need to, so long as we review and approve their qualifications.

I will be out of the office Friday, August 12 and Monday-Tuesday August 15-16.

We do need a signed response, so we cannot accept an answer by email. But you can fax the signed response if you need these changes more quickly than by regular mail. Our fax is 610-337-5269, and make sure you list your license number (29-30291-01), docket number (030-34108) and the control number for this licensing action (137370) on the letter.

thanks,
Betsy Ullrich, Senior Health Physicist
Commercial and R&D Branch
