Subject: Mid Cycle

I understand that each of you provide any needed information to regional management for the mid cycle reviews such as the disciplines of the allegations we received at each plant. In addition, you can pass along the attached table which provides the number of allegations received from on site sources as of June 30, 2004. The plants which are as of June 30 2004 3 times the median number and 2X the median number of allegations and show an increase in the number of allegations received of 50% are indicated.

Hope this is of help. If any of you need anything else, let me know.

-Andrea K.
