Subject: Fwd: PSE&G Case

I just received the attached Internet E-mail from UCS in response to my phone call last week. It would appear that they have now decided not to provide copies of the DUI citations to the NRC as was agreed upon during the phone call. I note that the attached message now appears to refer to one DUI citation vs. more than one, as was inferred in previous contacts. In reading the e-mail message, it would appear that UCS has restated their option to contact the media and/or congress about this. The e-mail reiterates that they"have your (the NRC) letter in response to the allegation stating that the NRC looked into the allegation and found nothing improper." This would appear to imply that UCS intends to question the NRC followup of this matter in a more public forum (even though DL indicated to me in our initial phone call that he didn't think that would be the right thing to do). ==> Also of note, Greg Smith called me last Thursday (10/7/99) from Pittsburgh where he was at a meeting attended by a number of nuclear site security managers. Greg informed me that during a discussion with the Salem/Hope Creek security manager, the subject of the status of [REDACTED] came up in the conversation. Greg did not solicit any informatoin about the allegation concern. However, unsolicited, the Salem/HC security manager told Greg about an anonymous allegation that they had received internally about [REDACTED] and a DUI charge. Apparently, the Salem /HC security manager indicated that they checked with the authorities in New Jersey, Pennsylvania, and Delaware and found no record of such an offense. The Salem/HC security manager did not indicate to Greg whether they had contacted the local authorities (i.e. the [REDACTED] police).
