10-7-64

OCT 7 1964

Dr. Herbert J. Kouts
Post Office Box 626
Brookhaven, New York 11719

Dear Dr. Kouts:

This will confirm that a copy of a report dated September 18, 1964, by D. F. Peterson of the Los Alamos Scientific Laboratory, entitled "Sulfur Neutron Dose Estimates in the United Nuclear Corporation Criticality Accident", was distributed by hand by Dr. Mann to you and the Technical Review Committee members during the week of September 28, 1964.

Attached is a revised copy of the Idaho Falls Report with revision date of October 2, 1964, and entitled "Radiochemical Analysis of the United Nuclear Incident at Wood River Junction, Rhode Island". The revised copy includes several corrections and some additional information on indium foil analysis, as shown on page 7 of the report. Please destroy or return your original copy of the Idaho Falls Report which was forwarded on September 23, 1964, and dated September 17, 1964.

Also attached is a copy of a report by Dr. John B. Stanbury dated September 30, 1964, entitled "Summary Report to the Atomic Energy Commission on the United Nuclear Corporation Criticality Accident of 24 July 1964". Dr. Stanbury is a medical consultant to the Division of Compliance.

Very truly yours,

Original Signed by
[illegible]

for Lawrence B. Low, Director
Division of Compliance
