Criticality Branch, DML

UNITED NUCLEAR CORPORATION, WOOD RIVER JUNCTION, RHODE ISLAND - IN-PROCESS
STORAGE AND REVISED ENTRAINMENT SEPARATOR - DOCKET NO. 70-820, DECEMBER 14,
1964

SYMBOL: DML:RHO

United Nuclear has submitted a license amendment to permit the storage of five one-gallon and two one-liter containers on the west wall of the first floor column room and to permit the replacement of the present ten-inch diameter Raschig ring filled entrainment separator of the evaporator with a five-inch diameter section.

We recommend approval of the subject license amendment application, provided your cover letter confirms that the solid angle calculations for the bottle storage rack were made to the nearest column (1-C-6) instead of column 1-C-7. Mr. Cronin of UNC indicated this to be the case to R. H. Odegarden of this Branch during a telecon on January 7, 1964.
