Charles D. Luke, Chief Criticality Branch, DML

UNITED NUCLEAR CORPORATION, MOOD RIVER JUNCTION, RHODE ISLAND - VACUUM CLEANER - DOCKET NO. 70-820, APRIL 2, 1965

SYMBOL: DML:RHO

United Nuclear has requested a license amendment to permit the use of a safe geometry vacuum cleaner system to collect dry uranium bearing materials. One inch drain holes have been provided in the housings surrounding the vacuum cleaner and one-gallon collector, to insure safety in the event solutions were to enter these parts of the apparatus.

We recommend approval of the subject license amendment application.
