INSPECTION OF GULF UNITED NUCLEAR FUELS EXPORT SHIPMENT AT PORT OF EXPORT

On September 7, 1973 an inspection was made of two, 15 gallon steel drums, DOT SP 3000, UNC Model 1352, which contained 20,994 grams of uranium metal enriched to 93% U-235. This inspection was made at the Air Canada air freight terminal at O'Hare Field, Chicago. This same material was verified at the Gulf United plant on August 23, 1973. (Reference letter to Region III Files of August 28, 1973.)

The two drums were first received by the Emery Air Freight Corporation as the forwarder from St. Louis and then delivered to Air Canada for flight shipment. On inspection the outer seal on each drum was found to be intact, and there was no evidence of either container being breached. All labels and a packing list were still affixed to the drums. The Emery Air Freight bill specified air cargo flight only and hand-to-hand signature service requested.

There was no copy of this hand-to-hand signature form available with any of the shipping papers from Air Canada on Emery Air Freight. A phone call to Gulf United later confirmed that such a form was included when the shipment left the plant for the St. Louis airport.

The shipment left O'Hare Field at 5:15 p.m. September 6, 1973, on Flight No. 578 for Toronto, Canada. Other pertinent data is listed below:

Gulf Outer Seal No. 4528	Drum No. 9
Gulf Outer Seal No. 4830	Drum No. 11
Emery Air Freight Bill No.	STL-31642
Air Canada Air Waybill No.	014-5442-0110

The results of the inspection and the flight time of the shipment were phoned to the licensee on September 7, 1973.
