Subject: RE: Iowa's Legally Binding Method for Increased Control

Andy -

At the request of Don Flater, I am responding with the State of Iowa commitment for our legally binding method for increased control. Don has reviewed and concurs with this response.

The State of Iowa commits to implement increased controls identical to those dispatched by the NRC on September 2, 2005 (RCPD-05-014), subject to the following change:

State of Iowa licensees will notify the Iowa Department of Public Health/Bureau of Radiological Health rather than the NRC Operations Center to satisfy the requirements of IC2.d and IC3.a.4.

The State will use the identical table of radionuclides of concern that the NRC provided in RCPD-05-014.

The State will use the identical letter and license condition provided by the Organization of Agreement States (OAS) in their letter dated September 6, 2005, with information specific to the State of Iowa, substituted for the bolded notations.

Subject: Iowa's Legally Binding Method for Increased Control

Paul, Andy-

I have included the text of the license amendment, which we will use to implement the increased control of some radioactive materials. We plan to adopt the NRC controls AS WRITTEN.

We hope that you can get this reviewed by September 15.

Additionally, we would appreciate, if you communicate with us electronically in this matter, that you "Reply to All." For the next three months there will be at least on of us in the office each day. However, not all of us will be here on any given day. Since all of us will be involved in instituting these controls, we must all, because of the schedules, be kept up to date on all correspondence with you.

Proposed License Condidtion:

The licensee shall comply with the requirements described in the Iowa Department of Public Health letter dated [insert date] and attached document entitled "Increased Controls for Licensees that Possess Sources Containing Radioactive Material Quantities of Concern." The licensee shall complete implementation of said requirements within 6 months from the issuance of this license condition or the first day that radionuclides in quantities of concern are possessed at or above the limits specified in Table 1 of the attachment to the Iowa Department of Public Health letter dated [insert date], whichever is later. Within 25 days after the implementation of the requirements of this condition, the licensee shall notify the Iowa Department of Public Health in writing that it has completed the requirements of this condition.

It probably doesn't matter, but for clarity, we will not use the "hanging indent" on this paragraph.

If you have any questions, please contact us.

Dan McGhee
