RE: Materials License 45-25258-01

Regarding the termination radiation and contamination survey of our 3125 Rivers Bend Blvd. office performed on August 22, 2005, by our Nuclear Medicine Technologist Suzanne Journigan and reviewed by our consultant Medical Physicist, Dr. Dean Broga.

All radioactive sources and other materials were moved to our new facility prior to performing the termination radiation and contamination survey.

The Ludlum Model 3 survey meter is equipped with a Model 44-6 sidewall G-M detector with a rotary beta shield for general-purpose survey.

The results reported on the contamination survey are net dpm. The NaI well counter used automatically subtracts background counts.

We would like to release this facility for unrestricted use as soon as possible; the owner would like to modify the facilities for the next tenant.

If you have any question please do not hesitate to contact me or our consultant medical physicist Dr. Dean Broga at (804) 828-5877.

Sincerely,

Phillip Duncan, M.D.
President
