AUG 17 2005

Peter D. Gausewitz
Radiation Safety Officer
Materials Testing Consultants, Inc.
693 Plymouth, N.E.
Grand Rapids, MI 49505

Dear Mr. Gausewitz:

Enclosed is Amendment No. 06 renewing your NRC Material License No. 21-15281-02 in accordance with your request.

The following issues were not addressed in your application for renewal in accordance with NUREG 1556, Vol. 1, Rev. 1.; Leak testing, inventory, use of survey instruments, routine and non-routine maintenance. Therefore, in accordance with my voice mail to you on August 16, 2005, your renewed license contains these requirements. Also please be advised of the new security requirement that became effective July 11, 2002. This requirement is contained in License Condition No. 17. Please review these requirements carefully and be sure that you understand all License Conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>. The enclosed license document is exempt from public disclosure in accordance with 10 CFR 2.390, because its disclosure to unauthorized individuals could present a security vulnerability.

P. D. Gausewitz

2

Sincerely,

James R. Mullauer, M.H.S.
Health Physicist
Materials Licensing Branch
