Subject: Fwd: Comments on Proposed Director's Decision

Joe,

In response to a petition filed pursuant to 10 CFR 2.206, on August 1, 2005, we issued a proposed Director's Decision (DD) regarding the 1C loop stop isolation valve at Byron, Unit 1. The proposed DD was sent to both Exelon and the petitioner for comment. In the transmittal letter, the NRC indicated that comments would be considered in the final version of the DD.

Attached are comments received from the petitioner. In order for the NRC to better understand the Exelon statements regarding entering a commitment to develop a plan into the CAP, as stated in Exelon's May 27, 2005, response to RAI Question #2, please address the comments in the first paragraph of the attached e-mail with regard to how the commitment is to be monitored and the procedure for dispositioning it.

Please let me know if you have questions.

Thank you,

George Dick
