LISLE, ILLINOIS 60532-4352
SEP 07 2005

Joseph Hunt, M.D.
Radiation Safety Officer
Hendricks Regional Health
1000 East Main Street
Danville, IN 46122

Dear Dr. Hunt:

Enclosed is Amendment No. 14 to your NRC Material License No. 13-17082-01, in accordance with your request. Please note that in License Item 9, some of the wording, describing authorized use of licensed material has been modified to reflect current licensing guidance. These and other changes made to your license are printed in **bold font**.

Also, please note that use of I-131 in greater than 30 microcurie quantities for diagnostic procedures requires a written directive and as such is licensed under 10 CFR 35.300 and not 10 CFR 35.200. Therefore, the license amendment requested was issued accordingly.

Please review the enclosed document carefully. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedures for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

The enclosed license document is exempt from public disclosure in accordance with 10 CFR 2.390, because its disclosure to unauthorized individuals could present a security vulnerability."

Sincerely,

A handwritten signature in black ink, reading "Loren J. Hueter". The signature is written in a cursive style with a large initial "L".

Loren J. Hueter
Materials Licensing Branch
