Dear Mr. Kirslis:

This to request exemption from the 10CFR70.51(f) requirement to remeasure UO_2 product lots which cannot be loaded into shipping containers prior to starting our July 7, 1987 physical inventory. This exemption is requested due to the difficulty and expense that would be involved in applying and then removing a tamper-safe paper seal for each of the stainless steel containers. As we discussed, the location, nature and packaging of the items make any change in contents unlikely.

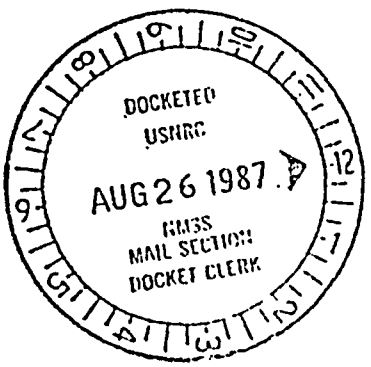
In lieu of remeasurement of the recently produced UO_2 product lots, we will:

1. Reweigh 10% of the approximately 700 cans, selected at random.

2. Use gross weight agreement criteria equal to the greater of 0.5% of the gross weight or 100 grams.

3. Reweigh 100% of the cans if one or more exceed the agreement criteria. Inventory data and lot totals will be corrected for can differences exceeding 100 grams.

Please advise if you have a question. We appreciate your consideration and assistance.



Very truly yours,

COMBUSTION ENGINEERING, INC.

Subject: SNM Audit of Hematite Material Control
& Accounting Procedures

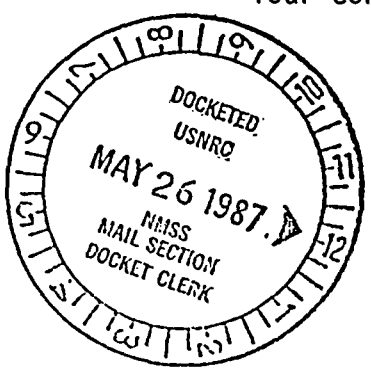
Dear Mr. Jackson:

The annual SNM review and audit of Hematite's Material Control & Accounting Procedures was last conducted April 29-May 1, 1986. This review and audit is required in accordance with regulations set forth in 10CFR70.58(c)(2).

We are requesting a delay in performing the 1986 review and audit to the week of May 11, 1987. The reason for the request is due to availability of review and audit team due to scheduling problems.

A check in the amount of $150.00 will be forwarded to you under separate cover.

Your consideration to this request is most appreciated.



Very truly yours,
