Subject: Draft Closeout for RI-2003-A-0138

Appended is the draft closeout for 2003-0138.

I agreed with the first 6 of 7 responses without many reservations; however, the seventh response is a little weak on why the CI wasn't getting his OJT signed off. It implies that he/she wasn't making much of an effort and provides some background why PSEG believes that was the case. I did not necessarily find it compelling, but I also did view it as a significant part of the original allegation. So, I considered the overall response to item seven to be acceptable. I still would be interested in your take.

BTW, it needs to go out by Friday. (Day 180)
