Subject: **Re: Referral Letters**

Two more referrals are attached.

The remaining referral (2004-0020) needs a little more work. I think the original allegation is lacking important detail that relates to the scope of the problem. I think as many as 400 notifications may be affected out of population of 1500 - 2000 notifications. I need to check the allegation file a few transcripts. Since your not open on Saturday, I guess I'll have to wait to Monday.
