Mr. T. E. Torjusen
American Machine & Foundry Company
56 Street and Second Avenue
Brooklyn, New York

Subject: MACHINING OF SLABS

Dear Mr. Torjusen:

This is to advise that 50 uranium slabs of the approximate dimensions, 1.25" x 8" x 80" are being shipped to your location from Superior Steel Corporation for surface conditioning.

We would appreciate it if American Machine & Foundry Company would machine these slabs by the removal of as much stock as may be required to clean up the surface (top and bottom only) providing that the finished slab thickness is not less than 1 inch.

The machined pieces are required for further processing work at Superior Steel Corporation scheduled for the last week in July. Your efforts to complete this job for delivery to Superior on or before such time will be appreciated.

The shipment address is as follows:

Superior Steel Corporation
Carnegie, Pennsylvania
Attention: R. Boyer

We have asked Mr. S. Braiden, Accountability Branch of the New York Operations Office to process the accountability documents under Station MSA, 70 Columbus Avenue, New York, N.Y. as previously done under Station COL.

If we can be of any assistance in expediting the rapid completion of the required job please do not hesitiate to contact Mr. Noto at this office.

Very truly yours,

cc: C. Pellicari, AM&F
