I note in a letter from C. E. Bussert, National Lead Company, to W. A. Carlson, Superior Steel Corporation, dated February 1, a copy of which was sent to G. E. Dunlap, that Bussert suggests visiting Superior when they roll the Westinghouse order. What is our present policy regarding NLO personnel visiting Superior during rollings and is there any difference policy-wise between runs for Savannah River and others such as WAPD?

MATERIALS 5

In reply to your memorandum of February 8, we would certainly welcome the attendance of yourself and Mr. Bussert at our next Superior Steel rolling of February 22, and any in the future.

There is no difference in policy between runs for Savannah River and others, such as the WAPD-PWR. Since the Union at Superior Steel has been briefed on the type of material they are handling, restrictions on number of visitors have been relaxed. However, as you can appreciate, we attempt to keep the number to a minimum to assure that there aren't too many people under foot.
