ROLLING AT SUPERIOR STEEL CORPORATION

C. L. Karl, Area Manager AEC - Fernald

G. W. Wunder

As discussed with you by phone late last week, the enclosed is a summary of the events leading up to our request of Mr. E. J. Reardon, Vice President, Superior Steel Corporation, for attendance at the forthcoming rolling of two of our personnel in addition to Mr. P. Merrill who has been requested to perform work during the rolling.

As indicated to you, we are willing to have the arrangements made by the New York office, Atomic Energy Commission, although we do feel that attendance by personnel from this company would be advantageous to the rolling program.

Yours truly

SUBJECT: ROLLING AT SUPERIOR STEEL CORPORATION

FMPC
MATERIALS -5-

SYMBOL: FA:114/6

You will recall our telephone conversations on the above subject. I am enclosing some correspondence received from National Lead Company pertinent to this subject.

As you can see, it would appear that the situation is becoming more embarrassing on each rolling. In the interests of good contractor relationship, I would appreciate your advice on how we might handle the next case with some advance planning which would eliminate the cancellations that we encountered on this occasion.

Enclosure:
