Re: Allegation No. 98-A-0102

I have completed my review of the OI transcript for the above allegation. Although no new technical issues were identified respective of this allegation, I noted two instances during the interview where the Alleger referred negatively about the Employee Concerns Program.

More specifically, the Alleger mentions that the Employee Concerns Program is not independent or impartial because it is staffed by licensee management personnel with the intent of trying to cover up for other licensee management. Further, for these reasons, staff do not utilize the Program.

We plan to repanel this allegation for possible closure of the technical concerns within the next month pending the residents completing their writeup of the technical issue of a main steam valve being repacked without an engineering evaluation being performed.
