Subject: Closeout Letter for RI-99-A-0042 (bubble hood issue)

Glenn and Leanne,

Per the Management Directive, I contacted NRR before making the formal referral to them to assure that they would accept it (this is a new wrinkle in MD 8.8, to try to stop allegations from being shuffled around inappropriately). NRR indicated that the question has already been asked and was answered in response to a question posed after the new Part 20 was issued. Rather than adding a month or more to the red tape, NRR asked if we could provide the response to the allegor, since the response to the question has already been documented in the public record. So, I have changed the closeout letter to provide the previously generated response. I have indicated in the letter that if the allegor has any further questions, he should contact NRR. NRR has agreed to this approach. I will need you to concur in the letter again so we can get it out. It needs to go out pretty quickly. Thanks.
