Subject: **allegation info**

Regarding file 2004-0020,

Today, June 7, 2004, around 12:30pm, I had a phone conversation with the alleged. I used his work number to make contact and he called me back a few minutes later from a secure location.

I explained he had been treated anonymously through a referral of the concerns to PSEG, that I was reviewing their response and would like additional information to have specific examples to cite in our request for information back to PSEG. Specifically I asked about the Salem valve with the boron leak cited in notifications dating 2002-2004 (from one of the original referred concerns). He indicated he would take some time to gather information, and get back to me by Thursday. He has my work phone.
