Subject: **phone message about allegation 0020**

Scott,

I got enough different information from the allegor this time that, after relaying some of the details to Dave Vito, he thinks it's fine to open a new file on the current issues. I'm just waiting to make sure we can refer the new issues (so we can address the new file in an ARB appropriately). I will write up an allegation receipt form either way. *The allegor should contact me today regarding referral ok/no.*

The old file is probably closable based on my better understanding of the allegor's issues. Regarding this original allegation file referral response (which I only talked about, I didn't actually have the response during available during our meeting), he acknowledged that the procedure for entering notifications has changed since he first initiated the concern and he indirectly indicated that this issue was probably addressed in at least a superficial way.

Anne
