Public Meeting on the Review of Emergency Preparedness Regulations and Guidance for Commercial Nuclear Power Plants (8/31 - 9/1/05)

The meeting is open to all stakeholders and the public.

The purpose of the meeting is to discuss selected topics for the review of emergency preparedness regulations and guidance for commercial nuclear power plants. The selected topics also include emergency preparedness-related issues that arose during the 2005 National Radiological Emergency Preparedness Conference, NRC/FEMA workshop.

The first day of the meeting will cover topics pertaining to potential changes to emergency preparedness regulations and guidance for commercial nuclear power plants. This portion of the meeting will be conducted as a roundtable discussion among participants who have been invited to represent the broad spectrum of interests in the area of emergency preparedness. The spectrum includes representatives from State, local, and Tribal governments; Department of Homeland Security (DHS)/Federal Emergency Management Agency (FEMA); NRC; advocacy groups; and the nuclear industry. The meeting is open to the public, and all attendees, including State, local, and Tribal governments not represented at the roundtable, will have an opportunity to offer comments and ask questions throughout the meeting.

The second day of the meeting will include a discussion of emergency preparedness-related issues that arose at the NRC/FEMA workshop during the 2005 National Radiological Emergency Preparedness Conference. This part of the meeting will be conducted in a town hall-type setting, and all attendees are encouraged to participate in the discussion.

In addition, the NRC has arranged tours of the Operations Center on the second day (September 1, 2005). These tours are available to meeting attendees on a first-come first-served basis. Tours will start at 7:00 am, 1:30 pm, and 3:00 pm. Each tour is limited to 20 individuals. Those interested should contact Sally Billings (SAB3@nrc.gov) to sign up.
