Subject: <small>(NOTE: This will be used as the Documents Title in ADAMS)</small>	Current Status	
Summary:	<p>The following items were discussed:</p> <p>1) Current status of stored waste: The waste is still on site and is being controlled in the same manner as was observed during the April site visit. No additional information on waste characterization was provided by their contractor. No further characterization has been performed, although some bids have been received for having this done as well as for having the waste shipped. No current plans exist to do this however, due to lack of funding. Licensee asked for information on any other contractors they may contact for additional quotes. I told lic. I would forward information on how to contact local HP Society. This organization can put him in touch with local companies.</p> <p>2) Revised Dose Assessment Status: During April site visit, I had informed the licensee that we were accepting the revised dose assessment that had been submitted, pending the verification of certain assumptions that were made for it. These items would be verified during a confirmatory survey that will be performed after the waste is shipped offsite.</p>	
Action Required:	<p>1) NRC will send letter summarizing the above information to the licensee</p> <p>2) E-File sent to LAT</p>
