Dear Sir,

I can't believe the United States would even consider letting China buy our gas companies or any properties that are of national concern. Why are we giving away our Country!!!!!! What about the security risks to us. We give and give taking away from the people of the United States and shouldn't we be thinking about how this is going to affect our Nation. It seems to me that money has become the main issue when it comes the United States and their decisions.

Let's keep our country safe and take care of our needs before we consider one more way to give our Nation away. Stop handing things over to foreigners their agenda is in our best interest.

Sincerely,

Glenda
