Is another nuclear power plant. Anyone who is for this type of energy better read some history behind these plants and how many 10's of 1000's were/are sickened by the releases of these plants, and the nuclear waste that is already overflowing each reactor site. To even consider even building one, takes a person who has no heart and no soul as this waste is going to sicken and kill us for time eternal. This is not the answer. When someone comes up with a way to store this waste (which is not under a mountain) then one might start to even think of such a thing. DO NOT DO THIS !! Sincerely, Linda C. Ferris
