NUCLEAR REGULATORY COMMISSION**

REGION III  
2443 WARRENVILLE ROAD, SUITE 210  
LISLE, ILLINOIS 60532-4352

SEP 18 2005

Carol Lentz  
Radiation Safety Officer  
Warner Lambert, LLC  
2800 Plymouth Road  
Ann Arbor, MI 48106-1047

Dear Ms. Lentz:

Enclosed is Amendment No. 58 renewing your NRC Material License No. 21-01443-06 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

In accordance with our telephone conversation on September 12, 2005, we agree with your conclusion that a change of control did not occur as specified in your letter to the Commission dated June 18, 2003, signed on September 9, 2005. However, as we discussed, because a name change occurred as a result of your corporate restructuring, you will need to amend your letter of credit and standby trust agreement. This amendment should go to the attention of Kevin Null, U.S. NRC, Region III. Also as we discussed, your program code was change from a Type B Broad scope code to Research and Development code based on the structure of your NRC license.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>. The enclosed license document is exempt from public disclosure in accordance with 10 CFR 2.390, because its disclosure to unauthorized individuals could present a security vulnerability.

C. Lentz

2

Sincerely,

  
James R. Mullauer, M.H.S.  
Health Physicist
