Oper Det Process

TRAINING: To Be Conducted during ROP Regional Counterpart Meetings

REMARKS: 9900, Tech Guidance: Oper Det Process (Operability Determinations & Functionality Assessments For Resolution of Degraded or Nonconforming Conditions Adverse to Quality or Safety) guidance has been issued to replace STS10P, "STS Section 1.0 -Operable/Operability - Ensuring the Functional Capability of a System or Component" and STS30DEG, "STS Section 3.0 - Resolution of Degraded and Nonconforming Conditions". The inspection guidance has been combined into a single document and revised to reflect relevant changes that have been made to NRC regulations, policies, and practices, and clarifies selected issues based on operating experience.

DISTRIBUTION: Standard
