NAME

ADDRESS

I, Clarence Cook & Wife having lived []
for the last 25 yrs. and have
raised a garden every year since we lived here never
having any sign of contamination from Combustion
Engineering Co. also picked wild strawberries & blackberries
in blocks of plant for years and the people of Hematite &
Lake Virginia are getting our water from a well within 1/2
mile from Combustion Engineering and Mr. Maurice Lucas
living within a block of said plant has been using
his well water ever since the plant has been here and
found no contamination in his water. If Combustion
Engineering Co. is so contaminating why is it that
the gardens & pastures are not affected by the plant?
Before we close we would like for you to give
this some thought and answer it about what
we just said about Combustion Engineering Co.

Sincerely Yours
Clarence & Ruth Cook
