AMS NO. RIII-95-A-0126

TC

On October 18, 1995, you provided the U.S. Nuclear Regulatory Commission with information that during July 1995 a ABB Combustion Engineering health physics technician was disciplined for falsification of records. Our review into your concern has been completed and the results are documented as follows:

The concern that a health physics technician was disciplined for falsification of records was substantiated. However, the HP tech's action had no impact on safety since the oxide plant was shutdown at the time and therefore had no affect on NRC-required records.

Your cooperation with the U.S. Nuclear Regulatory Commission was greatly appreciated.

Sincerely,
