Subject: License Revision to Chapter 6.0 – Nuclear Criticality Safety

Reference: NRC License SNM-1097, Docket 70-1113

Dear Sir:

The Global Nuclear Fuel - Americas, LLC (GNF-A) facility in Wilmington, N.C. hereby submits a revision to the criticality safety program requirements in Chapter 6.0 of our Consolidated Application, currently Revision 4. This submittal is made in accordance with Section 1.3.1.2, “Changes Not Requiring Prior NRC Approval”, of the current Consolidated Application.

The following change is incorporated by this submittal:

- Revision of Section 6.2.2, Means of Control, to align passive engineered, active engineered, and administrative control definitions with the Standard Review Plan, NUREG-1520.
- Revision of Section 6.3.2, Analysis Methods, to align the Keff limit and criticality code validation technique descriptions with current methods and terminology.

Attachment 1 provides replacements in their entirety for the Table of Contents, the Revisions By Chapter and Chapter 6.0. These replacement sections are dated 9/29/05 and are identified with the next Revision number. Vertical lines (|) in the right hand column indicate where changes have been made.
