Subject: Request to group plants per level of public interest

Release
Elizabeth Hayden

Diane, Ken, Jan, and Victor,

As you know, Mindy is spearheading the effort to do a baseline survey to measure agency "openness" in support of one of our strategic goals and approved by the Commission. We have met with the contractor who will use the American Customer Satisfaction Index in telephone surveys with 250 randomly-selected local officials around US nuclear power plants.

I am asking you to group the plants in your region according to High, Medium or No public interest. For example, I would expect to see plants such as Indian Point, Davis Besse, Vermont Yankee, Diablo Canyon in the "High" group. There's no hard and fast criteria for these groups, just your best judgment. Your response would be appreciated by COB Thursday, 8/12. Thanks.

Beth
