

PREDICTABILITY

J. Alan Price
Site Vice President
Millstone Power Station

MANTG Exam Conference

August 16, 2005

*“It’s not what you know, it’s how
you use what you know when
you need to most.”*

“How can it be that the crew did not use what they collectively knew to prevent the event?”

Of all our processes, the one that has the most direct impact on reactor safety is the process of selecting and training licensed operators.

“We cannot predict what a given plant might do on the next exam.”

Keys to Exam Success

- Well-trained candidates
- Talented and experienced exam writers
- Management oversight of the exam process
- Candidates' exposure to the exam process
- Frequent and quality interactions with the NRC
- Validation, validation, and validation

NRC Exam Success by Region
