Seabrook Station
10CFR Part 71 Quality Assurance Program

FPL Energy Seabrook, LLC hereby provides notification, pursuant to the requirements of 10CFR71.101(f) that it intends to renew its Quality Assurance Program Approval for Radioactive Material Packages License No. 0835, Revision 1, which expires on November 30, 2005. The Seabrook Station Operational Quality Assurance Program (OQAP) meets the requirements of Appendix B to 10CFR50 as described in Section 17.2 of the Seabrook Station Updated Final Safety Analysis Report and has been established, maintained, and executed with regard to transport packages. The Seabrook Station OQAP was approved by the NRC in conjunction with the issuance of Facility Operating License NPF-86. The current FPL Energy Seabrook, LLC OQAP description is contained in Revision 10 of the Seabrook Station Updated Final Safety Analysis Report.

It is noted that the current revision of this approval identifies North Atlantic Energy Service Corporation as the licensee. Due to an administrative oversight, this license was not transferred to FPL Energy Seabrook, LLC at the time of the acquisition of a majority interest in Seabrook Station and the transfer of the Facility Operating License to FPL Energy Seabrook, LLC. This oversight has been documented in Seabrook's Corrective Action System. Subsequent to the acquisition, the OQAP program described in Section 17.2 of the UFSAR has remained in effect, therefore this oversight did not result in any adverse consequences.

NMS501

Should you require further information regarding this matter, please contact Mr. James M. Peschel, Regulatory Programs Manager, at (603) 773-7194.

Very truly yours,

FPL Energy Seabrook, LLC
