Re: COMPLIANCE OF CONFIRMATORY ORDER DOCKET NO. 030-33635,  
LICENSE NO. 45-15200-04, EA-04-103.

Dear Mr. Congel;

On September 20<sup>th</sup> and 21<sup>st</sup>, 2005, Soil Consultants Inc, (SCI) administered initial learning modules addressing a Safety Conscious Work Environment (SCWE) and Employee Protection pursuant to 10-CFR 30.7. The modules were presented to the technicians and to our support personnel in the first session and to the managerial staff in the second session. Each module was tailored to meet the needs at every level.

Currently, the refresher is in development and will be on file within 21 days of the administration of the initial training modules as per our contract agreement with the consultants. The consultant firms' resume and the initial training modules are on file and are available to you at your request.

The initial modules will be administered monthly to new hires and all will receive a refresher every six months. Our training calendar will reflect the availability of our training programs.

We are pleased with the great response and participation of our staff. Soil Consultants Inc. will strive to continue our positive safety culture and employee protection policies.

If we may answer any questions or if you need further information, please feel free to contact me at (703) 366-3000 Ext. 225.

Sincerely,

David F. Johns, P.E.  
President
