

November 15, 2005

MEMORANDUM TO: Jack R. Strosnider, Director
Division of High Level Waste Repository Safety
Office of Nuclear Material Safety
and Safeguards

FROM: C. William Reamer, Director **/RA/ E. Collins for**
Division of High-Level Waste Repository Safety
Office of Nuclear Material Safety
and Safeguards

SUBJECT: SELF-ASSESSMENT OF THE NUCLEAR REGULATORY
COMMISSION HIGH-LEVEL WASTE REPOSITORY PROGRAM

During FY2005, a Nuclear Regulatory Commission (NRC) team performed an evaluation of the NRC's High-Level Waste Repository program, as required in Appendix B of the NRC Strategic Plan for FY2004-2009. This activity examined, from the perspective of the Office of Management and Budget's Program Assessment Rating Tool (PART), the agency-wide regulatory program for the potential high-level waste repository at Yucca Mountain. This evaluation concluded that the program is well positioned to accomplish its objectives, and contains several recommendations for FY2006 actions that will help the program prepare for a PART review, currently scheduled to occur in FY2007.

The self-assessment report is attached, and is being made publically available through ADAMS.
