A. GENERAL SYSTEM/APPLICATION(system) INFORMATION

(See definitions at end of document)

1. Person completing this form:

Name	Title	Phone #	E-mail	Office
Wilson, John	Deputy Project Manager	415-5932	jjw1@nrc.gov	OIS

2. System owner:

Name	Title	Phone #	E-mail	Office
Taylor, Chutima (Dee)	Project Manager	415-6034	cdt1@nrc.gov	OCFO

3. What is the name of this system?

Budget Formulation Application

4. Briefly describe the purpose of this system (support of what agency function)

The objective of this project is to improve and simplify the budget formulation process. Specifically, the project is performing a business requirements analysis of the current process to determine how best to 1) streamline the budget formulation process and 2) automate those processes where automation will make the process more efficient and effective. The final outcome of this effort will assist the agency, specifically all of the program, support, and regional offices and the OCFO staffs that are involved in the budget formulation effort, to

- reduce the administrative burden (e.g., eliminate excessive staff time and the duplication of data entry of budget information into multiple systems),
- improve quality, timeliness, and confidence in the budget outcome,
- increase credibility by producing accurate and concise budget data,

- produce “what if” scenarios,
- reduce large amount of paper used to produce the budget control reports, and
- enable the end-users to be able to access the budget information electronically.

DEFINITIONS

Personal Information:

Personal Information is information about an identifiable individual that may include but not be limited to:

- race, national or ethnic origin, religion, age, marital or family status

- education, medical, psychiatric, psychological, criminal, financial, or employment history
- any identification number, symbol, or other particular assigned to an individual
- name, address, telephone number, fingerprints, blood type, or DNA

Aggregation of Data:

Aggregation of data is the taking of various data elements and then turning them into a composite of all the data to form another type of data such as tables or data arrays, or collecting data into a single database.

Consolidation:

Consolidation means combining data from more than one source into one system, application, or process. Existing controls for the individual parts should remain or be strengthened to ensure no inappropriate access by unauthorized individuals. However, since individual pieces of data lose their identity, existing controls may actually be diminished - e.g: a summary census report may not point at the individual respondent but rather at a class of respondents, which makes it less personal.
