RE: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Proposed License Amendment Submitted January 20, 2005
Withdrawal of Technical Specification Changes Associated With TSTF-101

By letter dated January 20, 2005 (L-2005-008), Florida Power & Light Company (FPL) requested to amend Facility Operating Licenses DPR-31 and DPR-41 for Turkey Point Units 3 and 4 respectively. The proposed amendments would revise the Turkey Point Units 3 and 4 Technical Specifications to incorporate eight generic changes that have been made to the Improved Standard Technical Specifications (ISTS), NUREG-1431, "Standard Technical Specifications Westinghouse Plants." These generic changes, known as Travelers, were developed by the Technical Specifications Task Force (TSTF) and had been previously reviewed and approved by the NRC.

In recent conversations with the NRC staff, the staff expressed a preference to process the proposed technical specification changes that are associated with TSTF-101, "Changes to AFW Pump Testing Frequency to be in Accordance with the Inservice Testing Program," as a separate Licensing Amendment Request rather than as a TSTF. Accordingly, FPL requests that the proposed changes to Technical Specification 3/4.7.1.2 under TSTF-101 be withdrawn. Please contact Mr. Walter J. Parker, Licensing Manager, Turkey Point Units 3 and 4 at 305-246-6632 if there are any questions about this request.

Very truly yours,

Terry O. Jones
Vice President
Turkey Point Plant
