RE: Decommissioning of NRC License # 29-30516-01

Dear Mr. Courtemanche:

As per our discussion, we are enclosing the final decommissioning survey of our facility, which was performed by PHP Environmental Consulting in August 2005. Our entire facility is 12,000 square feet and the radio active material area was 450 square feet (receiving, testing and storage areas).

The decommissioning Survey was done on Beckman-Coulter LS 6500 Multi Purpose Scintillation Counter, using Beckman-Coulter Ready Safe Scintillation Cocktail, Quigen plastic vials and Whatman Grade 3 size 2.3 cm wipes.

We request your assistance in canceling our license # 29-30516-01.

If you require and further information please do not hesitate to contact me.

Sincerely,

Artur Lewandowski (Microbiologist)
Microbiology Manager

Enclosure: Decommissioning Survey.
