Dear Mr. Collins,

As per your request, the following information expands upon my initial response to Item #10, the Audit Program.

*The upper management fully supports the RSO's decisions and actions with regard to the administration of the radiation safety program. However, he is solely responsible for its maintenance, including correction of deficiencies and violations. Failure to do so may result in a reprimand, removal as RSO, and possible termination of employment for dereliction of duty.*

Please feel free to contact me at the above number if there is any further information that you require.

Thank you.  
 Sincerely,

Edward E. Acquaro
