(NOTE: This will be used as the Documents Title in ADAMS)

Summary: I left a message on Mr. Brown's voice-mail for him to get back in touch with me.

I left a message with Mr. Blaney concerning the payment of annual fees by the licensee. Mr. Blaney returned my call and indicated that the licensee was fully paid up in relation to fees.

10:00 I spoke with Mr. Brown. He informed me that he was the regular medical consultant for the licensee. The licensee did possess a single Cesium-137 source in the gantry of the gamma camera. The source was removed from the camera in July 2005 and transferred to Cardinal Health. I thanked Mr. Brown for the information and stated that I would contact Cardinal Health for additional information.

10:15 The receptionist indicated that Ms. Saula was at their Youngstown facility and could be reached at 330-759-7407. Ms. Saula stated that they had received the Cesium-137 gantry source from the licensee. It was not included in the October 11, 2005 letter because they were not sure that it was the licensee's. I thanked Ms. Saula for the information.
