TELEPHONE NUMBER 812.234.6688 x369 03120 Robert E. Sleeman, RSO E 5 Main Office Inspection Next Inspection Date: October 2010 X Field Temporary Job Site PROGRAM SCOPE The International Paper Company employed 180 individuals at its Terre Haute plant, operated continuously, and produced "medium" for cardboard products. The licensee possessed one Pm-147 Impact 440 gauging device installed on its paper machine. The gauge was used for thickness measurements of the product. The licensee also possessed two generally licensed gauges containing Cs-137. The licensee retained the services of an authorized consultant who serves as the authorized gauge user. The inspector noted all sealed source leak tests, inventories and shutter tests were performed at the required frequencies. During this inspection, the NRC inspector toured licensee's plant, performed independent radiation surveys around the gauge and the immediate working areas, reviewed select records, and interviewed select licensee personnel. The inspector also noted that immediate environmental conditions around the device.
