Attn: Mr. W. D. Beckner

Subject: Utility Attendance at GE ESBWR Fuel Presentation to NRC 10/25/05

This letter is to document our request and discussions with NRC staff regarding attendance of a representative from Dominion Energy Limited ("Dominion") during the presentations by GE on October 25, 2005, to the NRC of GE proprietary information related to the ESBWR fuel design in support of the NRC's review of the ESBWR design control document.

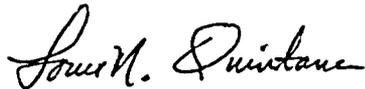

Dominion and GE have a formal agreement under which GE is supporting Dominion in the latter's DOE Nuclear 2010 program effort to develop and submit for NRC approval a combined construction and operating license (COL) based on the ESBWR design. Dominion is, thus, working with GE in planning for ESBWR and COL licensing activities, some of which are the subject of the afore-mentioned presentations to the NRC. The agreement between Dominion and GE provides for the disclosure by GE to Dominion and the nondisclosure and protection by Dominion of GE proprietary information.

It is our understanding based on our discussion with NRC staff that this attendance by Dominion's representative at the October 25, 2005, closed meeting will be accommodated. We appreciate the NRC's accommodation of this request. The Dominion representative will be Mr. Mark Paul.

Sincerely,

Louis M. Quintana
Manager, Licensing
