License Number: 22-26786-01

Dear Peter Lee,

Regarding your questions of the space close-out request of letter dated September 30, 2005, I have located site maps of the building which delineate sections or "bays" that can be used to describe our space changes. Please see attached maps (Roseville Properties) and my lab close-out map (Parker Hughes Institute).

Bays 12 and 13 will be released to the building owners pending your approval. Bays, 14 and 15 have very recently had the lease renewed and will remain under our control. Section J of bay 14 (close-out map) will no longer be used for handling radioactive materials. Our plans are to renovate the lab space A, B, C and J as needed.

Please note remaining isotope use areas will remain controlled areas until license termination procedures are completed in the future and will not be affected by lease termination next June.

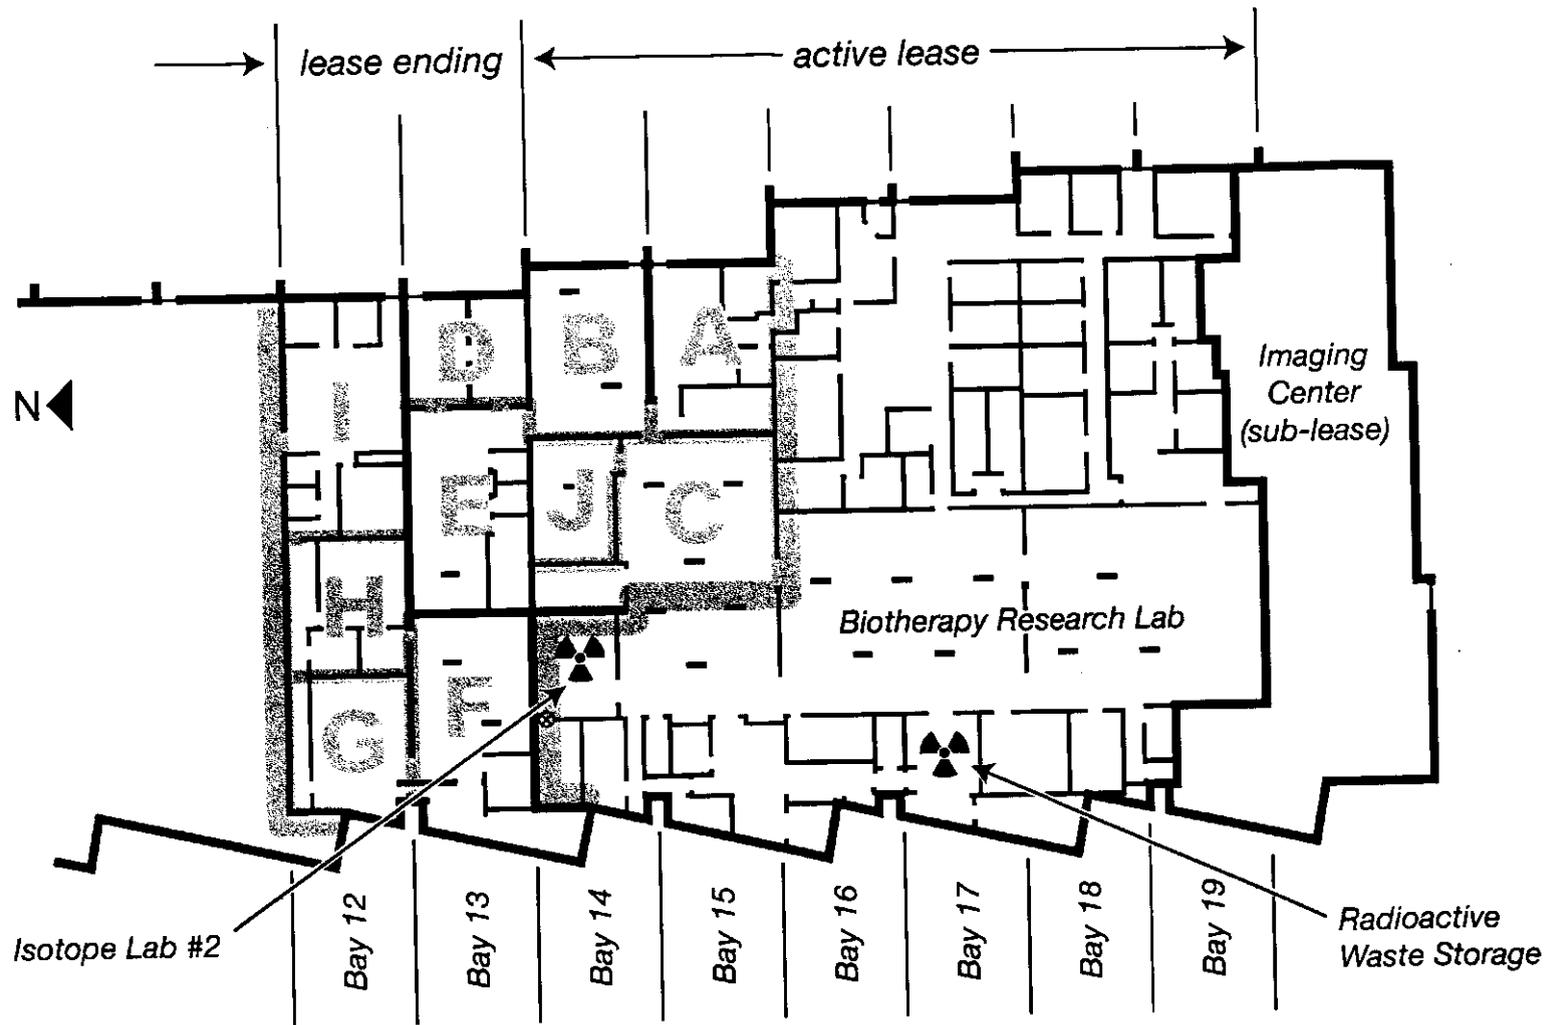

Please call me at 651-247-1922 for concerns, additional information or instructions.
Thank you

Sincerely,

Catherine Knox
