SAFETY EVALUATION REPORT
Docket No. 71-9309
Model No. RAJ-II Package
Certificate of Compliance No. 9309
Revision No. 4

SUMMARY

By application dated August 3, 2005, Global Nuclear Fuel (GNF or the applicant) requested an amendment to Certificate of Compliance No. 9309, for the Model No. RAJ-II package. GNF did not request any changes to the package design or authorized contents.

EVALUATION

By application dated August 3, 2005, GNF updated drawings for the Model No. RAJ-II to correct undersized welds and wrongly positioned package markings. The changes were the result of a 10 CFR 71.95 report dated July 8, 2005.

The staff reviewed the documents referenced in the certificate and determined that the documentation was available and complete. There was an editorial discrepancy in one of the supplements listed. The date was changed to reflect May 25, 2005, as the correct date for the supplement.

Condition No. 9 of the certificate was revised to authorize use of the previous revision of the certificate for a period of approximately one year from the date of issue.

CONCLUSION

This change does not affect the ability of the package to meet the requirements of 10 CFR Part 71.

Issued with Certificate of Compliance No. 9309, Revision No. 4 on November 9, 2005.
