## SUMMARY OF INFORMATION COLLECTION REQUEST

Title: NRC Form 396, Certification of Medical Examination by Facility Licensee (FINAL)

Current Burden/Responses: 751 hours/1,240 responses

Proposed Burden/Responses: 758 hours/1,287 responses

Burden Attributable to Third-Party Collections: 0

Number of Respondents: 137

Frequency of Response: On occasion and every six years for renewals

Reasons for Changes in Burden/Responses:

The overall burden increased by 7 hours from 751 to 758 hours because the number of notices of disability increased by 50 from 25 to 75, thereby increasing the burden by 12.5 hours. However, the number of records retained decreased by 60 from 4,760 to 4,700, decreasing the burden by 6 hours (60 x .10), because of license terminations and the decrease in the number of facilities by 3, from 140 to 137. There has been an increase in the overall cost as a result of an increase in the rate from \$157/hr to \$205/hr.

Level of Concurrence:

Director  
Division of Inspection Program Management  
Office of Nuclear Reactor Regulation

Recordkeeping Requirements in Accordance with the Retention Periods for Records Rule:

Recordkeeping retentions are in accordance with standard record retention periods.

Search of the Information Requirements Control Automated System (IRCAS):

IRCAS was searched and no duplication was found.

Abstract:

NRC Form 396 is used to transmit information to the NRC regarding the medical condition of applicants for initial operator licenses or renewal of operator licenses and for the maintenance of medical records for all licensed operators. The information is used to determine whether the physical condition and general health of applicants for operator licenses is such that the applicant would not be expected to cause operational errors endangering public health and safety.
