200 ARMY PENTAGON
WASHINGTON DC 20310-0200

Army Safety Office

MEMORANDUM FOR: Nuclear Regulatory Commission, Division of Industrial and Medical Nuclear Safety, Office of Nuclear Material Safety and Safeguards, Washington, D.C. 20555-0001

SUBJECT: Proposed Director's Decision 10 CFR 2.206 Petition

Dear Mr. Miller,

The U.S. Army has reviewed the proposed decision of the 2.206 Petition submitted by Mr. James Salsman. We concur with the proposal to deny seven of the eight petition items. We believe this is the correct decision and support the facts as described by the NRC in their analysis. The U.S. Army also concurs with the granting of Petition Summary Item 1, that Licensees within DoD be subject to existing documentation requirements. The U.S. Army NRC Licensees have always strived to maintain their programs in complete compliance with NRC regulations, and will continue to do so in the future for operations under NRC jurisdiction.

We thank you for the opportunity to comment on the Proposed Director's Decision and await the final decision.

Please contact me at 703-601-2405 if you have any further questions.

GREGORY R. KOMP
Army Radiation Safety Officer
