

PROPOSED REVISION 15
AP1000 DESIGN CONTROL DOCUMENT

Tier 1 Section 1.2

Definitions

Description of Change

Revise the definition of “A report exists and concludes that...”.

Editorial Justification

This change represents a clarification requested by the NRC staff.

Regulatory Consequence

This change represents a clarification only. There is no effect on the FSER. However, this change does represent a change to Tier 1 material.

Change Markup

Revise the fourth paragraph under **Implementation of ITAAC** as follows:

Many of the acceptance criteria include the words “A report exists and concludes that...” When these words are used, it indicates that the ITAAC for that design commitment will be met when it is confirmed that appropriate documentation exists and the documentation shows that the design commitment is met. Appropriate documentation can be a single document or a collection of documents that show that ~~meet~~ the stated acceptance criteria are met. Examples of appropriate documentation include design reports, test reports, inspection reports, analysis reports, evaluation reports, design and manufacturing procedures, certified data sheets, commercial dedication procedures and records, quality assurance records, calculation notes, and equipment qualification data packages.
