Please be advised that it appears that I have been put on Tarp Team D without my knowledge or consent. The Engineering Core Value of Openness, Trust, and Respect has been violated by this backdoor tactic. I request an immediate meeting with you to resolve this issue in and a fair, safe and equitable manner. I feel this was an extremely inappropriate action on management's part which has violated our core values. Furthermore, I have read the TARP procedure requirements and believe I have the appropriate rank nor the appropriate background and training to do this assignment.
