| Subject: | Bristol Myers Squibb generators | |
| <small>(NOTE: This will be used as the Documents Title in ADAMS)</small> | | |
| Summary: | <p>Mr. Pekelnicky stated that they switched over from Squibb generators to those produced by Mallinckrodt in 2002. Most of the personnel know how to use Squibb generators and he will provide training to those who have not used them. They have all of the equipment on hand to elute the generator and perform testing on the eluant. They only have to remove the "convertor" kit from the generator shielding so that it will accommodate the Squibb generators. Mr. Pekelnicky said that the Pittsburgh facility used Squibb generators for a longer period than the Erie facility. He would contact the facility and determine wether all of the pharmacists were knowledgeable in the use of the Squibb equipment that is on site. I thanked Mr. Pekelnicky for the information.</p> | |
